RE: Site Closure  
Federal Office Building, Omaha, Nebraska  
UG #050393-NM-1110  
IIS #61642

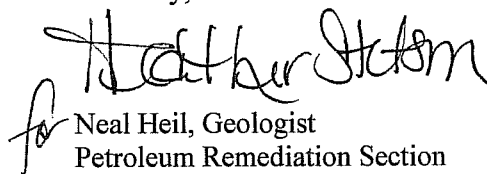

Dear Mr. Hartshorn:

The Department is in receipt of a letter, dated October 18, 2004, submitted by SCS Engineers for the above referenced facility. The letter indicates that all monitoring wells at the facility have been properly abandoned.

You have satisfied the requirement in my earlier letter, which specified that all monitoring wells be abandoned in accordance with Chapter 12, 012.04 of Title 178. The investigation into the release of petroleum at your facility is now formally closed.

Thank you for your cooperation in this matter. If you have any questions, feel free to call me at (402) 471-2186.

Sincerely,

for Neal Heil, Geologist  
Petroleum Remediation Section  
Water Quality Division

cc: Jerrett Domling, SCS Engineers
